This report summaries 1976 traffic volume and vehicle miles of travel on rural sections of the Interstate, Primary, Secondary and Federal Aid Urban Systems. Average daily traffic volumes on the Interstate and Primary Systems are further classified into out-of-state passenger cars and commercial vehicles. Comparisons are made with traffic volumes for the years 1974, 1975, and 1976 for each section of the Interstate and Primary Systems. Pickups are included in passenger cars in order to show a more realistic picture of travel by the heavier commercial vehicles. Some of the more important comparisons of travel on Montana's Federal Aid Systems are shown in the following tabulations.

The Interstate System, which consists of about 18% of the total Primary mileage, carried 40% of the total traffic, 47% of the commercial trucks, and 59% of the out-of-state passenger cars that traveled on the Interstate and Primary Systems during 1975.
